

TEXAS LOCAL GOVERNMENTAL
DATA PROCESSORS DIRECTORY

JUNE, 1976

PREPARED BY

H.F. BERGER
DPC MANAGER
THE CITY OF VICTORIA
VICTORIA, TEXAS 77901

FOREWORD

Local government officials and staff members in Texas have been enjoying benefits from state-wide organizations and associations for many years. Being a relatively new field in local government, data processing has been excluded from these associations. Each agency has had to develop and operate their own data processing facilities with little or no knowledge of existing similar facilities in the state.

Those involved in local government and data processing share similar interests and problems. I feel that a state-wide listing of data processing facilities would be a step in correcting the situation.

You will notice that not all local government agencies in Texas are included in this listing. The compilation concentrates on the smaller sized municipalities, counties, schools, and those using smaller based equipment. This second edition contains 56 agencies from throughout the state, representing a broad spectrum of equipment and applications.

Many of the individuals polled in the survey have expressed a desire that this informal association can lead to a more formal association of cooperation among governmental data processors in the state. My desire is that this directory will encourage communication among local government and data processors, to promote efficient work at all our facilities.
